# ADVANCED TECHNOLOGY SEAMLESS ROOFING AND WATERPROOFING

Sikalastic® RoofPro Systems

## Sikalastic® RoofPro

**Sikalastic® RoofPro Systems** have you covered from the most basic roofing project to the most challenging and everything in between. Our systems are applied in new construction and refurbishment, whenever the use of a sheet membrane is too complicated to provide fast, effective and safe installation. Sikalastic® RoofPro Systems are highest performing waterproofing systems with over 30 years track record, equipped with up to 25 years systems warranty, but also provide lots of opportunities to enhance the appearance of your project. **A wide range of colors** enable architects and building owners to create eye catching roofs. The **seamless** waterproofing membrane does not only reduce the risk of leakage and water ingress, it is also another feature to enhance the appearance of any roof, or in case of historic landmarks to maintain its original design and shape.

All colors have been thoroughly tested for UV stability and color fastness to ensure not only durable waterproofing functions, but also long lasting esthetic appearance for the most challenging projects.

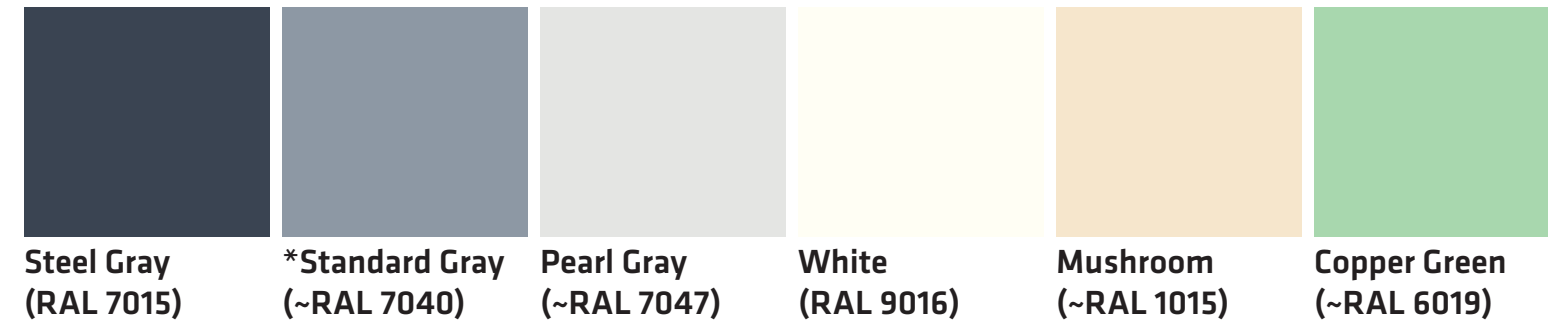

# STANDARD COLORS

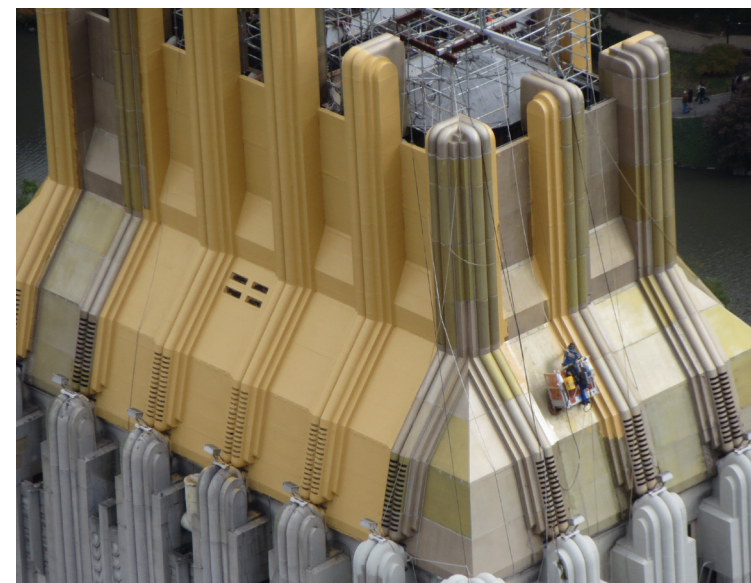

# MADE TO ORDER COLORS

# ACCESSORIES

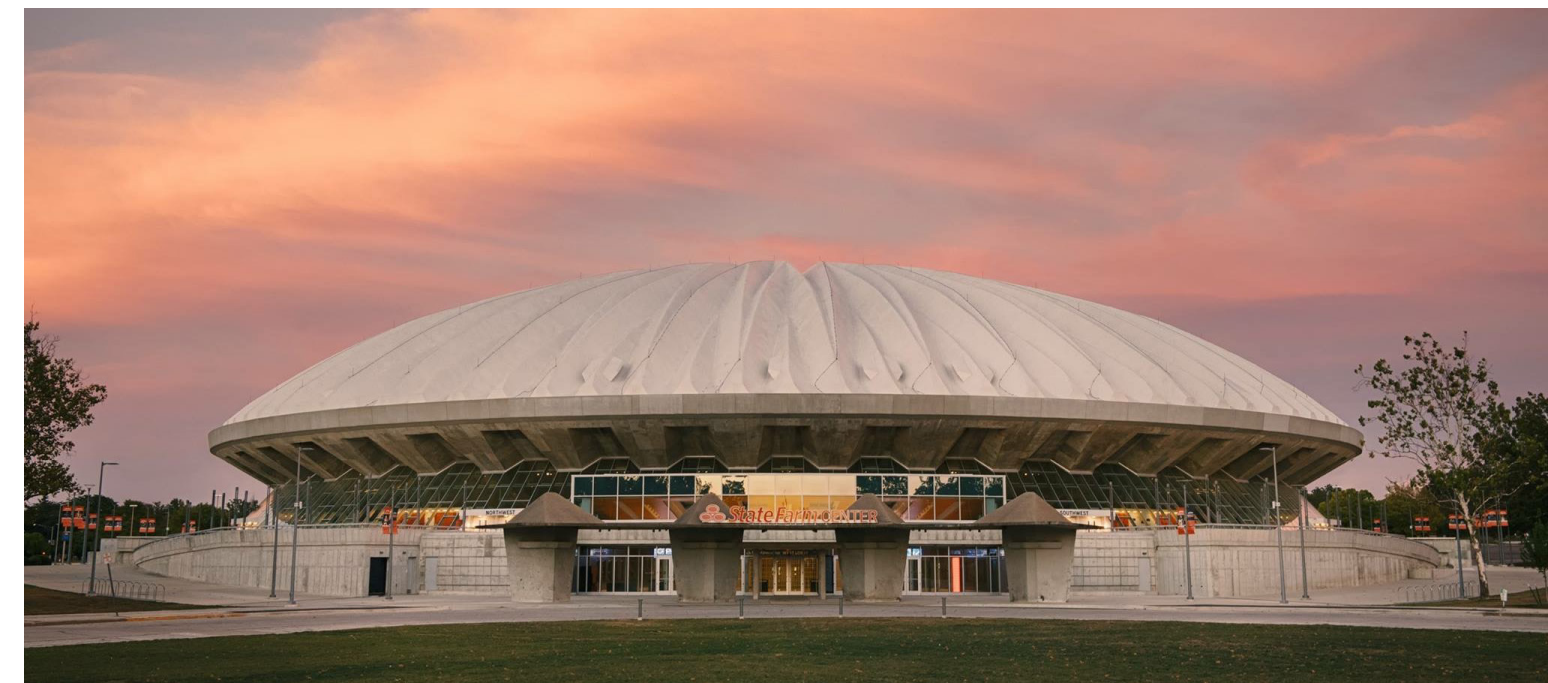

A selection of 6 standard colors are available with no minimum order quantity.
