Sikalastic RoofPro and RoofCoat recover systems are excellent choices for contractors/owners to add value and bring savings to their roofing options. Simply cleaning, priming and coating; an old roof's life can be extended for another 15 to 25 years. Determining a roof's suitability for recover includes a visual inspection and a moisture scan to ensure there will be no trapped moisture under the recover application. Furthermore, RoofPro products are easy to apply: no mixing, no stirring, just dip with a roller and apply!

Key Characteristics	Sikalastic RoofPro				Sikalastic RoofCoat		
	Sikalastic-644 Lo-VOC	Sikalastic-641 Lo-VOC	Sikalastic-624 WP	Sikalastic-621 TC	Sikalastic-646 Lo-VOC	Sikalastic-500	Sikalastic-515
Low VOC	■	■			■	■	■

Building owners can enjoy a rejuvenated roof without the need to replace their existing roofs or make costly additions. Sikalastic RoofCoat options are typically considered as roof maintenance and Sikalastic RoofPro Recovers provide a building owner with a true new roofing membrane system that is fully adhered, fully reinforced and fully conformed to the existing roof surface.

\* Sikalastic-515 available up to 15 years

Specifiers can rest easy: while the existing roof may still provide waterproofing, it is significantly enhanced by the new Sikalastic RoofPro or RoofCoat system. Sikalastic RoofPro and RoofCoat recoverers can prolong the life of Mod-Bit, EPDM, TPO, PVC, Hypalon, and metal roofs while providing a reflective white or a vast array of custom colors. RoofPro is also excellent for Smooth BUR roof assemblies.

Applications	Sikalastic RoofPro				Sikalastic RoofCoat
